Tools & Platforms: Linux, Docker, Claude Code (AI-assisted development)

Professional Experience

AVB Marketing, Remote Nov 2023 - Present
Software Engineer

- Own features end to end, from scoping and technical planning through build, testing, and release.
- Ship features across the whole storefront: search, product pages, catalog, account, cart, and checkout.
- Build with Next.js, React, and TypeScript, using server-side rendering for performance and SEO.
- Design state management with Redux Toolkit, including lazy-loaded state to keep bundles lean.
- Integrate third-party services such as payment, financing, personalization, and analytics.
- Review teammates' pull requests and mentor coworkers, helping them get unblocked and keeping code quality consistent.

Nuro, Mountain View, CA Jan 2021 - Nov 2022
Operations Recruiting Coordinator

- Moved candidates through the hiring pipeline quickly so offers went out on time.
- Sourced candidates with Teamable and LinkedIn Recruiter.

Command Center Operator

- Monitored and operated autonomous vehicles remotely through teleoperations, supporting teams across the company.
- Diagnosed software issues during operations, escalated incidents by protocol, and gave engineers feedback to improve the software and safety.

Rocket Power, Mountain View, CA Aug 2019 - June 2020
Data Analyst

- Collaborated with software engineers and project managers to effectively organize large amounts of data using proprietary software.
- Identified and synthesized trends from a large sample of datasets.
